

Vyacheslav Babin

R&D / Backend & Applied ML Engineer

Astana / Remote · zzudva@gmail.com · +7 747 151-45-80 · GitHub/zzudva · Proof of Work

PROFILE

Technical lead and R&D software engineer working across backend, DevOps, applied ML/CV, generative AI, and real-time interactive media. I take projects from idea and prototype through architecture, backend/API, deployment, documentation, and handover — strongest at turning R&D prototypes into reproducible, production-ready systems.

SKILLS & STACK

Languages	Python, TypeScript, Go, C++, C#, Bash · Rust (growing)
Backend & APIs	FastAPI, REST, PostgreSQL, Redis, S3, integration services
DevOps & Infra	Linux/VPS, Docker & Compose, NGINX, CI/CD (GitHub Actions, GitLab CI), AWS/Azure
AI / ML	PyTorch, LLM/RAG (LangChain, FAISS), LLM adapters & chatbots, RunPod/GPU inference
Computer Vision	OpenCV, YOLO, DeepFaceLab, image/video processing & tracking
Generative Media	ComfyUI, Stable Diffusion, ControlNet, LTX-video, FlashVSR
Engines & Real-time	Unreal Engine (UE 5.6, PCG, geodata), Unity, digital avatars, installations
Media & Delivery	FFmpeg, HAP/DXT/BC codecs, C2PA provenance; Figma/Canva product demo

EXPERIENCE

Technical Lead / R&D Software Engineer, Contract / project work — Remote / Moscow 2023 - Present

- Architected backend/API and integration layers, data routing, internal tools, dashboards, and reporting for AI-enabled and R&D systems.
- Ran Linux/Docker infrastructure, CI/CD, release processes, and technical documentation; coordinated developers, designers, and stakeholders on scope and quality.

R&D & Multimedia Software Engineer (self-employed), Self-employed / project work — Remote 2019 - Present

- Delivered interactive installations, exhibition systems, product demos, and digital avatars with AI-assisted media workflows.
- Built generative-graphics pipelines (ComfyUI / Stable Diffusion) and computer-vision prototypes (OpenCV, YOLO); backend & DevOps for multimedia/R&D.

Full-stack Developer / Infrastructure Specialist, Client web & infrastructure projects — Moscow 2013 - 2018

- Delivered 50+ turnkey web/infrastructure projects: sites, web services, backend, CMS, and internal APIs.
- Ran Linux servers, hosting, monitoring, and backups; DevOps, QA, and small-team leadership.

SELECTED PROJECTS & PROOF OF WORK

2025 · EFKO — R&D / software engineering and multimedia; technical delivery.

2024 · Film “Fedya Footballer” — DeepFake-assisted media workflow; AI in film production.

2023 · “Feneron. City of the Future”, Zaryadye Park — Multimedia installation, technical production, interactive systems.

2023 · “BAM 2.0”, Russian Railways Museum — Interactive digital exposition and exhibition system.

2023 · Digital avatar “IRI-na” — Digital avatar and interactive presentation system for public forums.

2021 · Polytechnic Museum / EXPO Dubai (RF pavilion) — Multimedia, exhibition systems, interactive content.

Proof of Work — GitHub — MetaCam (AI-media FastAPI backend) · FlashVSR-runpod (GPU video API) · hap-converter (C++ codecs) · ComfyUI-Zudva (custom nodes) · meet_summariz (local STT/LLM) · UE world-simulation, private (OpenStreetMap + PCG).

Clients & collaborations — KHL · Lexus · Audemars Piguet · Paco Rabanne · Grand John Orchestra · Synergy University · EFKO · Polytechnic Museum · EXPO Dubai.

EDUCATION

Russian State Social University — Bachelor of Laws — intellectual property in contract relations, 2012-2017.
